THEORY OF SUPERCONDUCTIVITY A Primer

A Primer by Helmut Eschrig (2001, updated 09/2008) In 1964, Marvin L Cohen made theoretical predictions of T_c-values as high as 01K for certain doped semiconductors, and in the same year and the following years, superconductivity was found in As usual in Quantum Mechanics, $-i\hbar\partial/\partial r$ is the canonical momentum and $(-i\hbar\partial/\partial r$
